

Announcements and News from Miss Trenkamp

This coming week, the students will research specific Prophets of the Old Testament, and dive into the story of Mary in religion. In science, the students will begin identifying the parts of the water cycle. In reading, the students will conclude the story of A Wrinkle In Time. In math, the students will take the NWEA and conclude their unit on geometry. In social studies, the students will review the different dynasties and characteristics of Medieval China.

On Thursday, the students will take the spring math NWEA test. I encourage the students to put their best effort forth as always. Please encourage the students to get a good night sleep the night before and a good breakfast that morning. While the students are not defined by their score, it is a very helpful tool to measure the students' growth throughout the year.

Students are continuing to work hard to meet their fourth quarter goals. I am encouraging them to continue this stamina through the rest of the year. The students are already seeing considerable growth across the quarters, and I am looking forward to seeing them grow throughout the rest of this year.

Finally, with the spring season comes spring activities! I love to see the kids out and about outside of school. If they happen to have a home game or event please email me the date/time and I will do my best to make it!

Blessings,

Jordan Trenkamp

What did we do last week?

This week, the students continued reading A Wrinkle In Time, as the characters journey onward. They reviewed text features, and took their reading NWEA. In social studies, the students discussed the different Dynasties of Medieval China. In science, the students researched the effects of natural disasters. In religion, the students discussed the Davidic Covenant and the Prophets of the Old Testament. In math, students learned about volume and surface area.
